MARKET REVIEW

Portraying India as a reliable sourcing hub for Chemicals, Plastics, Constructions, Mining Industry, and Allied Products

Indian Chemical Industry stood as 3rd largest producer in Asia and 12th in world. The chemical industry in India is a key constituent of Indian economy, accounting for about 7% of the GDP. India accounts for approximately 7% of the world production of dyestuff and dye intermediates, particularly for reactive acid and direct dyes.

Indian Chemical Industry exports for 2016-17 is around USD 12.15 billion which is a growth of 4% over the previous year. India is currently the world's third largest consumer of polymers and fourth largest producer of agrochemicals. Indian Chemical Industry is One of the most diversified sectors, covering more than 70,000 commercial Products.

Plastics is among the fastest growing industries in India experiencing a double-digit growth rate on an average. The Indian Plastics Industry offers huge growth opportunities due to lower per capita consumption as compared to world average coupled with low labour cost and availability of skilled manpower and training centers. The plastics industry in India is making significant contribution to the economic development and growth of various key sectors in the country which includes automotive, construction, electronics, healthcare, and FMCG. The plastic processing industry has the potential to contribute in bringing foreign investments and thus India's vision of becoming a manufacturing hub.

The country is set to have 10 new plastic parks with an investment of Rs. 400 crore from the Government to boost domestic production of plastics. The setting up of plastic parks is expected to further increase competitiveness and investments, achieve environmentally sustainable growth and adopt the cluster development approach to consolidate capacities in the plastics sector.

In 2016-17, Indian Plastics Industry supplied products worth USD 7.6 billion to the world. India exported both plastic raw materials and finished products to over 200 countries across the globe, including top destinations such as the USA and European Union, as also to the emerging markets in Latin America, Africa and ASEAN countries.

India's Construction & Mining Sectors

The construction and allied sectors is responsible for propelling India's overall development, and the government's focus on the sector has paved ways for initialising policies that help creating world-class infrastructure. Industry experts estimate the Indian construction equipment industry's revenues to reach over \$22 billion by 2020. India's Exports of Construction and Allied Products material reached to US\$ 6.31 billion during 2016-17.

India is endowed with vast reserves of minerals including iron ore, bauxite, coal, limestone and manganese, and is among the top 10 countries globally for these ores. Mineral reserves are well distributed across the country. The reserves-to-production (r/p ratio) of various minerals in India remain low, reflecting significant unexplored opportunities in India. India has explored only around 5%-20% of its mineral resources to date. India's exports of Mineral products reached to US\$ 4.34 billion during 2016-17.

VISITOR PROFILE

CAPINDIA2018 will be an expansive showcase of India's manufacturing capacities and capabilities (including its abilities to service overseas markets) and will be attended by :

Trade visitors from across the country dealing in Chemicals, Plastics, Constructions & Mining Industry and Allied Products

Overseas Buyers from across the globe

Industry Leaders

Government Officials and Policy makers

Consultants and opinion builders

Education and R&D Experts

OEMs (Original Equipment Manufacturers)
